MOORE'S GOGO SHAMPOO WASH.

THIS WASH HAS PROVED ITSELF TO BE THE SENTED TO THE PUBLIC.

the Bank if marked On Hongkong THE Bases of this compound is made of Gogo Root. The natives of the Philippine Islands never use anything else for washing their hair; you never see them bald, and it is quite common to see the females with hair from 5 to 6 feet long. By using this SHAMPOD WASH as directed, you will never be bald. The Proprietor offers the Wash to the public, being entirely confident that by its restorative properties it will surely arrest decaying hair, completely eradicate scurf, dandruff, and cure all diseases of the scalp; it does not contain any poisonous drugs, but, by its cooling properties allays the itching and fever of the scalp. Mr. Moore has succeeded in being able to put this Wash up in bottles without allowing it to ferment, and he will guarantee it to keep any length of time in any climate. CAMPBELL, MOORE & Co., LTD.,

SPECTACLES Vs. BLINDNESS.

Vision is justly described as the most important of our senses, and its loss is regarded as one of the greatest afflictions to which mankind is subject.

It is, therefore, of paramount importance that we should carefully use our sight whilst perfect, and that when, unfortunately, the help of Spectacles is felt to be necessary, the utmost care should be taken in the selection of them.

The late eminent Oculist, Dr. Soelberg Wells, testified that he had no hesitation in stating that the haphazard plan of selecting Spectacles-omployed by some Opticinns-was frequently attended by serious consequences; that eyes were often per-manently injured, which might, by skilful adaptation of glasses, have been preserved for years.

> S. R. GROOM, Esq., p.R.o.s., Barrister-at-Law, Singapore,

Writes :-I have used Glasses for twenty years, and have no hesitation in saying that, those supplied me by you are the best I have ever worn. I wear them with much satisfaction and comfort, and find the frames are especially convenient.

LORD SALISBURY AT THE MANSION HOUSE London, Oth August .- Lord Salisbury at the Maneion House said that the Government will continue to rule Ireland firmly and to restore personal liberty; that the Statesmen of Europe were beginning to favor the policy of leaving Bulgaria alone, England only desiring its freedom and autonomy. Lord Salisbury believes that Russia will be satisfied if Bulgaria prospers under existing circumstances; that the new German Emperor is fully alive to the value of peace, the prospects of which have been distinctly strengthened by his late interview with the Czar, and the assimilating of the policy of Russia and Germany, Lord Salisbury concluded by eulogizing

WE trust that the imaginative correspondent who telegraphed Home about the ravages of Asiatic cholera in Hongkongabout whole families here being sweptaway and the town being in consternation, took the trouble to wire Home when the socalled cholera epidemic ceased, for these stupidly-sensational reports, reproduced in all the Home papers, caused great alarm to friends and relatives at Home. A large number of residents here received letters by the last mail anxiously inquiring as to the state of this cholera-stricken city and betraying great alarm as to the fate of their near and dear ones.

The men were running with the cart, and witness told them to control the pace, but they could not. The boy was just entering Centre Street when he was struck by a beam projecting from the cart and knocked down, the wheel of the cart passing over his back and killing him. The case was remanded till to-morrow.

> A san event took place on board the British ship Middlesex on her yoyage from Cardiff to Singapore. On the morning of the 7th of July last, while the vessel was in Lat 39° 19 S. and Long. 18° 10 E. an ordinary seaman named Albert Clarkson fell from the fore-yard to the deck and died almost immediately from his injuries. A terrific gale from the West was blowing at the time and the ship was just being hove to. Shortly before going aloft to farl sail Clarkson had been knocked down by a sea against the main deck capstan receiving some juries to his face. He seemed to make light of this and went up with the remainder of the crew, who had been on deck yard after every one had gone down and that on to the deck and never spoke again, lying a few minutes afterwards.

In an article on the subject of the new route by the Canadian Pacific, the Admiralty and Horse Guards Gazette Bays :- We must not omit to remark that our advocacy of the Canadian route to the East has been as an alternative route. We do not suggest it as a route which should supersede the Suez Canal or the Cape routes, either in peace or in war. At the same time we do assert that though in some points inferior to the Suez Canal and the Cape, it is in some points superior. Nor must we forget that the route and the country through which it passes are but little understood, and still in their injancy. Yet we are much mistakon if in a few years' time the claims of the Canadian Pacific Railway and the vast wealth now lying undeveloped in Canada and British Columbia are not much more fully appreciated than at present. Let us not forget that the multiplicity of our routes to the East multiplies the difficulties of hostile Powers in interrupting our communications. The present is the time to take advantage of the opportunities offered to us.

THE Acting Resident Councillor of Penang

concludes his administration report on that Settlement in 1887 by pointing out its steady growth in well-being all that year, Tin and tapicca producers especially prospered owing to the high prices ruling for these articles. The fall of silver, however grievous to many, has proved a distinct gain to the producing classes. The sugar industry seems to be the exception that . proves the rule in consequence of the baleful operation of the bounty system. The results of the action taken against the latter by the conference which lately sat at London, may be expected, ere long, to improve matters in this respect. Penang town in said to be extending considerably. The price of land has risen as a matter of course. The spread of architectural taste, as evidenced by the setting up of buildings superior in style and construction to those hitherto in use, will tend materially to improve the appearance of the town. -Straits THE HARBOUR AT ADEN.—It is satisfactory to learn, says the Engineer. that the work of deepening the harbour at this important

we have on several occasions commented, is soon to be put inshand. Official announceraised by the military authorities, which bave hitherto prevented the sanction of the Government being given to the work, have been overcome, and we may now expect that within a comparatively short time vessels resorting to the port, instead of having, as at present, to anchor fully half a mile from the shore, will be able to discharge their cargoes alongside jetties in connection with the wharves. The most important advantage, however, which may by expected to result from the improvement now decided upon will certainly be the conveniences that will be afforded for coaling steamers. At the present time all the coal has to be shipped in lighters and carried thence to the bunkers by natives. The dust arising from the friable cual-a condition of it due to the arid climate of Aden-constitutes an intolerable nuisance, which we may hope will soon now be removed. The difficulties which the military authorities have to encounter are by no means light, as it is pro-bable that entirely now hatteries will have to be hewn out of the rock for the special purpose of providing protection to this new auchorage. The soil of the harbour consists mainly of soft mud, so that the dredging operations are not likely to be

Tux Innan and International liner, which was launched nearly four months ago from the Clydebank shipbuilding yard of Messrs. Thomson, and which was on that occasion named the City of New York by Lady Randolph Churchill, is now lying in the Olyde complete. She is the largest passenger 2,000 persons. The vessel has five decks, nearly 40 feet. The topmost deck extends unbroken from stem to stern, 160 yards. The life-boats are carried 8 feet above deck. The engine and boiler spaces take up about 140 feet of the length of the ship. On each level there are hve water-tight compartments given up to passengers rooms, and each has a stairway. to the upper deck. The dining saloon, a light, airy, and cheerful compartment, takes up the height of two and a balf decks and is spanned with an arched roof 20 feet high. Along each side of the saloon, which is large enough to accommodate 300 persons, are recessor in which small parties may dine in sectuation. At the after sud of the salcon is a spacious hall, which conducts by a grand staircass to the promenade deck. At the top of the state are found the drawing-room and fibrary, the latter containing a collection of 800 volumes. The smoking-room is 40 feet, and is fitted up at one and with a large refreshment bar. All these rooms and the others destined for the public or private use of passengers are tastefully decorated and furnished. The gross tonicage is 10,500, and the engines.

THE AMERICAN MUSICAL COMED! AND OPERA COMPANY.

The charm of Sir the master of the shop coming down the Arthur Sullivan's music, however, is not asked me how much money I wanted. He quite so potent in 'Ruddigoro' as in the said the Canton steamer was just going to "Mikado" or 'Patience, and Mr Gilbert's whimsical humour is not so conspicuous as I said the inspector had told me to be in in some of his earlier efforts. The action of the piece, too, lags a good deal after the Arst act, and the conclusion is lame and in-

effective, like some of Mr Gilbert's quips. Still, the piquant flavour of the Gilbertian humour is there, and the score abounds with those charming turns of melody and quaint effects which are characteristic of Sir Arthur Sullivan's work. Mr. Gilbert's satire, it must be said, is sometimes too superfine to be seen by the audience, and his conceits are now and again rather farfetched. Not a few of the latter entirely failed to tickle the audience on Saturday night. For instance, the Basingstoke joke, so thoroughly characteristic of Mr Gilbert in kind, but so poor in quality withal, did not even raise a smile. One respect in which the opera is unlike the others of the brilliant series from the same pens is that it has but few catchairs. It would hardly be fair to judge the work absolutely by Saturday night's performance of it, because as it was then presented it was necessarily.

THE DEATH OF EMIN PASHA. Emin Pasha seems to have shared the same fate as General Gordon. News from the Dark Continent is so uncertain and so vague that we can only guess at what has occurred. It would seem that the White Pashs that was advancing on Khartoum was Emin and not Stanley, and according to a telegram from Zanzibar dated 1st inst. the former was led to leave his station-where he had formerly considered himself safe-owing to his provisions be- Premia Uncollected coming scarce and the Mahdists advancing | Due from Agencies : \$13,841.12 against him. GAMBLING IN INDO-CHINA.

In the Chamber of Deputies on the 17th oft. M. Constans explained the action of the authorities in Indo-China in authorising public gambling. In tracing the origin of the practice the Governor-Governal duclared that the profits derived from games of paratus is placed two or three feet in the chance belonged to the King of Cambodia, and he therefore feared that the suppression of gambling would have a projudicial effect. M. Tornision the new deputy for Cochin-Chins, demanded that the matter should be made the subject of an interpollation in order that the House might receive some explanations concerning the state of affairs in Indo-Olima and the dispute between M Constans and M. Delaporte, the Under-Secretary for the Colonies. The debate was fixed for the 18th.

Loudon, August 4.- The report of the Commission appointed to inquire into the Decean Mining Company's concession was presented to the House of Commons last night. The report shows that the Company has now about 700 shareholders, and that 85,000 fully paid up shares were issued, of which 55,000 were sold to the public. The Commission does not express any opinion regarding the prospects of the Company, but mentions that 130 tons of coal are raised weekly and that fine diamonds have been found. The Commission absolves Lord Lawrence, asit is of opinion that ho acted in perfect good faith. It admits the competency of the Company to transfer theres to the concessionaries, but doubts whether the same was the result contemplated by the Nizam's advisers. It suggests that the British Government might have given to the Nizam more effective advice and assistance. The Commission does not doubt the expediency of working the coalfields &c.

China Mail Office, Hongkong.

THE CHINESE MAIL THIS paper is now issued every day. I The subscription is fixed at Four Dollars per annum delivered in Hongkong, or Ten Dollars Forty Cents including postage to Coast ports.

It is the first Chinese Newspaper ever issued under purely native direction. The chief support of the paper is of course derived from the native community, amongst whom also are to be found the guarantors and socurities necessary to place it on a business and legal footing.

The projectors, basing their estimates upon the most reliable information from the various Ports in China and Japan,from Australia, California, Singapore, Penang, Saigon, and other places frequented by the Chinese, consider themselves justified in guaranteeing a large and ever-increasing circulation. The advantages offered to advertisers are therefore unusually great, and the foreign community generally will find it to their interest to avail themselves of

The field open to a paper of this description-conducted by native efforts, but progressive and anti-obstructive in toneis almost limitless. It on the one hand commands Chinese belief and interest, while on the other it deserves every aid that can be given to it by foreigners. Like English journals it contains Editorials, with Local, Shipping, and Commercial News and Advertisements. Subscription orders for the above may be
